Volume 17
1978

Number One

IBM's Santa Teresa Laboratory–Architectural design for program development 4
Gerald M. McCue

A method for the time analysis of programs 26
S. L. de Freitas and P. J. Lavelle

Measuring programming quality and productivity 39
T. C. Jones

The Extended Control Language of MPSX/370 and possible applications 64
L. Slate and K. Spielberg

Solving the installation scheduling problem using mixed integer linear programming 82
R. Chen, H. Crowder, and E. L. Johnson

Number Two

A cryptographic key management scheme for implementing the Data Encryption Standard 106
W. F. Ehrsam, S. M. Matyas, C. H. Meyer, and W. L. Tuchman

Generation, distribution, and installation of cryptographic keys 126
S. M. Matyas and C. H. Meyer

Cryptography architecture for information security 138
R. E. Lennon

Administrative control of computing service 151
H. M. Gladney

Data processing spheres of control 179
C. T. Davies, Jr.

Number Three

Job networking 206
R. P. Crabtree

Network job entry facility for JES2 221
R. O. Simpson and G. H. Phillips

Experiments in computer-aided graphic expression 241
J. F. Musgrave

A time-sharing display terminal session manager 260
J. M. McCrossin, R. P. O'Hara, and L. R. Koster

Enhanced problem determination capability for teleprocessing 276
J. B. Ford

Performance tuning in OS/VS2 MVS 290
T. Beretvas

Number Four

Distributed data processing 324
A. L. Scherr

National Westminster Bank mass storage archiving 344
C. M. Gravina

The development of software systems to aid in physical planning 359
B. S. Smedley

Data Stream Linkage Mechanism 383
J. P. Morrison

Performance investigations with a DOS/VS-based operating system model 409
W. Kraemer

A performance model of MVS 444
Willy W. Chiu and We-Min Chow
